Adventure Gold is committed to keeping you informed.

Did you know that the Quebec mining exploration boom strongly stimulates the economy in most of its northern regions?

Hear the news from various radio stations who interviewed Marco Gagnon, President of the *Association de l'exploration minière du Québec* and Adventure Gold, during the Quebec Mining Week.

Mentioned during the News Hour - April 29 to May 1, 2008
TRANSCRIPT

CKAC Radio 730AM and CFMB Radio Montreal 1280AM

NOTE: Originally broadcast in French

The *Association de l'exploration minière du Québec* (AEMQ) and partners launched its 17th Annual Quebec Mining Week with this year's theme focussing on the human resources of the mining industry in Quebec. Once again, this Week's partners have risen to the occasion and have put together a comprehensive agenda focussing on all areas of the mining industry within the province of Quebec.

According to Marco Gagnon, President of AEMQ and Adventure Gold: "In the last few years, the most significant gold discoveries in Canada have been made in the James Bay and Abitibi regions of Quebec; these areas being the most actively explored in Canada. In the last three years, the Bill Denis Prospector of the Year Award, the most prestigious award in the mining industry, has been presented to Virginia Mines for the Eleonore discovery and to Osisko Exploration for the Canadian Malartic project; two discoveries in Quebec totalling several million ounces of gold.

Such discoveries, including Agnico-Eagle's Lapa, Laronde II and Goldex, have had a strong positive impact on exploration activities in these two areas. Over the last 2 years, Quebec has seen an increase of 40% in new mining claim registrations. Adventure Gold is well positioned in the Abitibi region; the Company's 100%-owned Dubuisson project located west of Val d'Or is situated between Osisko's Malartic project and the future Agnico Eagle Goldex Mine."
